Travis Scott & Kylie Jenner Get Matching Tattoos

"Unfortunately the large lips which she has give her an abnormal look, ruining the balance of her face - where the lips should accentuate her looks, not be the main feature on her face", **Dr Kirk Brandow**, a plastic surgeon, explained in a recent interview.

The "Keeping Up With the Kardashians" star shared a picture of the black etching on her right foot on her Snapchat account on Monday (06.12.17).

The teenage millionaire pouted for the camera with a peach coloured hue covering her lips.

Speaking in a teaser clip of the forthcoming programme, she said: "For so long, I've been putting on this different persona to the world".

The song was released last month (May17), and on the track, the MC raps, "Heatin' up, baby, I'm just heatin' up/Need ya love, not a need, it is a must/Feelin' stuck, you know how to keep me up/Icy love, icy like a hockey puck".

"Y'all gonna tell me that [Kylie Jenner](#) didn't get a boob job?"

In November 2016, money experts Forbes estimated the reality star had made \$18 million (£14 million) thanks to her business. Let's just hope they don't regret the ink!

Jenner has been subjected to questioning about her body since she started going through puberty. Many stars speculating that she has just got her lips injected for it looked sexier and bigger this time.

"I don't share this with a lot of people, but everyone thinks I've gotten breast augmentation recently, but I haven't", she wrote on her website. It's just insane how much influence I have.
